

CAPSULE SUMMARY

CT-360

Dale H. Norfolk House

9001 Boyds Turn Road

Owings, Calvert County

Circa 1900

Private

The house at 9001 Boyds Turn Road was originally constructed circa 1900 as the primary residence for a tobacco farm. Although the house has since been divorced from its associated agricultural lands, evidence of its former association is provided by the extant tobacco barn which remains on the property. In the 1930s, the house was acquired by African American sisters H. Elizabeth and Regina Brown. The Brown sisters were Maryland natives who had been educated in Philadelphia and had returned to Calvert County to serve as elementary school teachers. The Brown sisters, unmarried with no children, taught in the Calvert County school system for many decades. In 1937 H. Elizabeth Brown, assisted by Thurgood Marshall, pursued a legal remedy to equalize pay for African American teachers. The case was settled out of court and teachers' salaries were equalized in Calvert County in 1939. Elizabeth Brown has been recognized for her efforts by induction into the Maryland Women's Hall of Fame. Both now retired, the H. Elizabeth and Regina Brown continue to own and reside in the house at 9001 Boyds Turn Road. The historic dwelling together with the associated domestic outbuildings, dating to circa 1930, are representative of a rural vernacular residence in Calvert County, Maryland, from the early 20th century.

Located in a rural agricultural setting, the historic dwelling is two stories in height, is clad in aluminum siding, and has a cross-gable roof sheathed in asphalt shingles. The house is three bays wide and has a two-story gable-roof ell and a one-story rear addition. The façade of the building is dominated by the one-story, full-width, half-hip-roof screened-in porch, and a central gable featuring a single six-light window in the tympanum. The house has 2/2 wood-sash windows with unmitered and unmolded wood surrounds and projecting sills. The three second-story windows on the façade are shaded by metal awnings. Other notable features of the house include projecting gables and eaves, a single central, interior, square, brick chimney, metal lightning rods on the roof, and a wood box cornice with flared ends in the side gables. A medium-sized tobacco barn dating to the early 20th century still exists on the property. The remaining historic outbuildings, including a garage, barbeque pit, and shed, date to circa 1930.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Located in a rural agricultural setting in Calvert County, Maryland, the circa 1900 dwelling at 9001 Boyds Turn Road is a two-story wood-frame building clad in aluminum siding with a cross-gable roof and a solid parged foundation. The house has a one-story, full-width screened-in front porch, a two-story ell, and a one-story rear addition. When constructed, the house was the primary residence for the surrounding farm, and a medium-sized tobacco barn dating to the early 20th century still exists on the property. The remaining outbuildings, including a circa 1930 garage, are associated with the domestic functions of the property.

SETTING. The historic house is located on Boyds Turn Road, just north of Chesapeake Beach Road, in the vicinity of the small rural community of Paris. The dwelling is situated a short distance back from and facing Boyds Turn Road, on an open, sloping lot. The house is accessed by a straight gravel driveway that runs from Boyds Turn Road to the south elevation of the house. Directly to the south, at the northeast corner of Boyds Turn Road and Chesapeake Beach Road, is a one-story commercial building. This land was originally part of the house tract. To the southwest of the lot, across Boyds Turn Road, is an area forested with young second-generation trees. Across the street to the west and northwest are open agricultural fields. The open, grassy lot on which the historic house sits is defined by tree lines to the north and east. To the immediate north of the house the land rises into a grassy knoll. Only a few mature trees dot the property and are confined to the immediate vicinity of the house. Two trees are located directly in front of the house and are placed symmetrically. Small plantings are also limited to the immediate area around the house. There is a flower-bed directly in front of the house defined by a low brick wall.

PRIMARY RESOURCE. The wood-frame dwelling is two stories in height, is clad in aluminum siding, and has a cross-gable roof sheathed in asphalt shingles. The house is three bays wide and has a two-story gable-roof ell and a one-story rear addition. The solid parged foundation is pierced with three-light wood windows. The façade of the building is dominated by the one-story, full-width, half-hip-roof screened-in porch, and a central gable featuring a single six-light window in the tympanum. The foundation of the porch is covered with metal sheets simulating rock-face concrete block. The house has 2/2 wood-sash windows with unmitered and unmolded wood surrounds and projecting sills. The three second-story windows on the façade are shaded by metal awnings. Other notable features of the house include projecting gables and eaves, a single central, interior, square, brick chimney, metal lightning rods on the roof, and a wood box cornice with flared ends in the side gables. The one-story addition has projecting eaves with exposed rafters. There is an oil tank adjacent to the south elevation that appears to date to the second quarter of the 20th century.

SECONDARY RESOURCES. Several domestic outbuildings are located south and southeast of the house in a roughly linear arrangement. Closest to the house at the end of the gravel driveway is a one-story, two-bay garage constructed of concrete-block masonry. The garage, circa 1930, has a front-gable roof sheathed in v-crimp metal, and wide openings for two cars to enter. The building has two-light windows with brick rowlock sills on the side elevations and a small extension to the east elevation. East of the garage is a modern one-story, one-bay pre-fabricated shed, circa 1980. The shed is clad in metal and has a front-gable roof sheathed in corrugated metal. East of the shed is a small concrete-block masonry barbeque pit, circa 1930, with a metal grate. East of the barbeque pit is a one-story concrete-block masonry shed, circa 1930, with a shed roof sheathed in v-crimp metal. The shed has 6/6 wood-sash windows with unmolded wood surrounds, exposed rafters, and a concrete-block stove chimney on the east elevation. Directly behind the house is a well, circa 1930, with a square concrete cap.

A medium-sized tobacco barn is located a distance behind the house along the east tree line. The wood-frame barn, which appears to have been constructed during the early 20th century, is clad in vertical flush wood boards and has a side-gable roof clad in a combination of v-crimp and corrugated metal sheets. The building has wood sills and hinged air-doors with metal hinges typical of late-19th and early-20th-century tobacco barns. There is a one-story shed-roof extension to the east side of the barn.

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

The historic dwelling together with the associated domestic outbuildings at 9001 Boyds Turn Road are representative of a rural vernacular residence in Calvert County, Maryland, from the early 20th century.

Throughout most of its history until the second half of the 20th century, Calvert County was a highly rural, agricultural county engaged primarily in tobacco cultivation and characterized by an isolated, highly dispersed population. At the time of the 1890 federal census, Calvert County was the smallest county in the state of Maryland both in land area and population, but fifth in annual tobacco production behind a number of significantly larger, wealthier and more populous counties. Just ten years later in 1900, Calvert County had more than doubled its tobacco production and had risen accordingly to the third largest tobacco producing county in the state behind nearby Charles and Prince George's Counties.

Accordingly, there was a county-wide increase in the construction of tobacco barns and associated domestic farmhouses during this period. Dwellings built during this period were largely two-story, wood-frame buildings three or five bays in width, with a center hall or side hall plan. Most had side-gable roof or a cross-gable roof with a central front gable, a one-story full-width or wrap-around front porch with turned posts, and a two-story rear ell. Stylistically, they featured such late Victorian era or Queen Anne stylistic elements as lancet or round-arched windows, fishscale shingles in the gable ends, and sawn brackets. These elements are particularly common in houses built during the late 19th century. By the first decade of the 20th century, houses exhibit less of these flamboyant decorative elements and favor a more simplified architectural expression. Interiors were heated by wood-burning stoves vented through narrow square brick chimneys.

During this period there were over 1,000 farms in Calvert County primarily engaged in tobacco cultivation, with an average size of approximately 125 acres. The house at 9001 Boyds Turn Road, dating to circa 1900, was originally constructed as the primary residence for one such tobacco farm. Although the house has since been divorced from its associated agricultural lands, evidence of its former association is provided by the extant tobacco barn which remains on the property. Built at the turn of the century, the house adopts the conventional farmhouse form of the period but exhibits none of the late-Victorian-era decorative elements seen so frequently on similar houses from the previous decades.

In the 1930s, the house was acquired by African American sisters H. Elizabeth and Regina Brown. The Brown sisters were Maryland natives who had been educated in Philadelphia and had returned to Calvert County to serve as elementary school teachers. (1) They initially rented the house at 9001 Boyds Turn Road for several years and then purchased the property in the 1930s. (2) Elizabeth Brown, born circa 1905, stated in an on-site oral interview that most of the associated domestic outbuildings were already present when she and her sister took up residence in the house. (3) Brown also stated that she had sold the adjacent parcel now occupied by a commercial enterprise. Extant architectural evidence suggests that the aluminum siding, metal awnings, and brick-lined planters in front of the house were installed by the Brown sisters during the mid-20th century, as well as the porch

screening. In spite of these later cosmetic alterations, the house and associated outbuildings are intact and are exemplary of an early-20th-century rural residence.

The Brown sisters, unmarried with no children, taught in the Calvert County school system for many decades. In 1937 H. Elizabeth Brown, assisted by Thurgood Marshall, pursued a legal remedy to equalize pay for African American teachers. (4) The case was settled out of court and teachers' salaries were equalized in Calvert County in 1939. Elizabeth Brown has been recognized for her efforts by induction into the Maryland Women's Hall of Fame. A historical marker commemorating Brown's achievements will be placed in 2003 on Maryland Route 2 near Mount Hope Community Center, a former elementary school for African American children where Brown served as principal. A plaque honoring Brown was affixed to the center in 2002. Both now retired, the H. Elizabeth and Regina Brown continue to own and reside in the house at 9001 Boyds Turn Road.

ENDNOTES
